

Science & Astronomy

Tuesday 27th March

Noon – 1pm
Student Centre, CIT

Learn about fingerprinting

Fingerprint analysis is the most well-known use of forensic science; first used as a form of identification in the 1850s. Fingerprints are unique to each individual – even identical twins have a slightly different pattern. Although unique, they can be grouped into fingerprint families. In this workshop, you take your fingerprints and compare and contrast them with the different groups of fingerprint families and the fingerprints from the rest of the group.

Booking is essential. T: 433 5108 E: sharon.lawton@cit.ie

Saturday 31st March

8pm – 10pm
CIT Blackrock
Castle Observatory
Castle Road, Blackrock

Stargazing and Earth Hour

CIT Blackrock Castle Observatory celebrates the festival in conjunction with Earth Hour. During the evening, members of BCO labs discuss issues such as light pollution and, with nearby lights shut off, the Cork Astronomy Club and BCO's astronomy volunteers guide visitors in stargazing. Please note – event depends on weather.

Car parks nearby – where you'll see the mural created during last year's festival. Bus no 202 from Parnell Place. Booking is not necessary. Enquiries to Ria O'Sullivan or Dee Geaney T: 435 7917 E: info@bco.ie W: www.bco.ie
