

CIT

Energy Policy

CIT is committed to the responsible consumption of energy and will strive to reduce our greenhouse gas emissions and carbon footprint to achieve the National & International energy efficiency target of 33% by the year 2020 as a minimum.

This will be achieved by;

- Ensuring the policy is appropriate to the nature and scale of the organisation's energy use and consumption.
- Supporting all energy reduction initiative's across the CIT campus through providing the necessary resources to achieve the targets.
- Communicating to our staff and students the importance of Energy management.
- Making our energy consumption visible by monitoring and reviewing energy objectives and targets.
- The use of energy-efficient technologies, and design for energy performance improvement.
- Continuous assessment, improvement and awareness, CIT will improve energy performance throughout all the Institutes buildings.
- The purchase of energy-efficient products and services.
- Complying with applicable legal requirements relating to energy use, consumption and efficiency.
